To ensure a faster turnaround time

- Be sure your content has been finalized before you submit it. Edits are more difficult during the design process, and extend turnaround time.
- Do not use Calibri font (often the default in ppt), even within charts and graphs. Standard fonts, E.g. Arial, Times or Tw Cen MT, are easy to read.
- Specify the desired width x height when content is submitted.
- Submit any edits or corrections to the proof via email; do not submit a new PowerPoint.
