Research Resources:
The resources to the right are available to all investigators affiliated with Children’s Healthcare of Atlanta (CHOA), including medical staff, Emory Department of Pediatrics (DOP) faculty and staff, and those outside of the DOP and CHOA who are members of our research centers. We encourage involvement of all those interested in research throughout our system, and provide this as a guide to resources along with our research website www.pedsresearch.org. Our goals are to build infrastructure and programs that serve a broad community of scientists and clinicians engaged in pediatric research, and provide training in grant writing and grant opportunities that enhance our extramural funding for all child health investigators affiliated with Children’s Healthcare of Atlanta. For suggestions and comments on any of the initiatives and resources, please contact Clinton H. Joiner, MD, PhD Clinton.joiner@emory.edu or Stacy Heilman, PhD stacy.Heilman@emory.edu

Grant and Manuscript Support
- Stacy Heilman, PhD
  Director, Research Operations 404-727-4819
  stacy.heilman@emory.edu
  • Assistance with finding grant opportunities and connecting to collaborators
  • Core laboratory assistance, supervision

Grants & Manuscript Editing
- Prioritized for extramural funding opportunities, program projects
- Experienced at program project management, grant and scientific paper editing
- Request form on pedsresearch.org; send to Stacy Heilman

Biostatistics Core
- Courtney McCracken, PhD
  • Traci Leong, PhD
  • Janet Figueroa, MPH
  • Scott Gillespie, MS
  • Mike Kelleman, MSPH
  • Martha Wezel, MSPH
  Procedure: Request form located at: http://www.pedsresearch.org/researc h/cores/biostatistics-core/overview/
  Priorities: analysis for grant applications and Publications

Pediatric Clinical Research Unit (PCRU)–A six-bed outpatient research unit/ A two-bed inpatient research unit/A four-bed inpatient research unit/ A core research lab/A research pharmacy/ Bionutrition services/Nursing Services including, but limited to: Medication administration including investigational drugs; I.V. access and port access; I.V. infusions; Routine and complex vital sign monitoring; Phlebotomy; Timed specimen collections such as PK trials and oral glucose tolerance tests; Telemetry monitoring; For more information, please visit: http://www.pedsresearch.org/research/support-services/dedicated-clinical-research-facilities

Clinical studies/coordinators
- CHOA Clinical Research Administration
  Sarah Marie Huban
  sarahmarie.huban@choa.org
  404-785-7477 and Stephanie Meisner
  stephanie.meisner@choa.org
  404-785-6453
  • Manager, Egleston campus:
    Lawrence Matarutse 404-785-0109
    lawrence.matarutse@choa.org
  • Manager, Hughes Spalding/Scottish Rite campuses:
    Beena Desai 404-785-2269
    beena.desai@choa.org
  • Lead Research Nurse, Pediatric Research Center (PCRU/CAP Building):
    Cheryl Stone, RN
    cheryll.stone@choa.org
    404-785-0400-main number

Emory Clinical Research Services
- Nadine Spring, Director
  404-727-5234

Scientific Facilities Manager
- Kira Moresco, MS
  kira.moresco@emory.edu
  404-727-6515

Equipment Core: Biosafety cabinet, incubators, clinical centrifuge, real-time PCR machine, standard PCR machine, multilabel plate reader, gel documentation system on order

Services: This core provides common equipment for investigator’s use, including access to benchtop space and hood space, centrifuges for clinical specimen processing

Laboratory Specimen Processing:
- Clinical Laboratory at Egleston and Scottish Rite
  • Heather MacDonald, Manager
  Advanced Diagnostics Laboratory
  404-785-5766
  heather.macdonald@choa.org or labresearchcoordinator@choa.org
  • Clinical trials specimen processing, shipping, limited storage
  • ACTSI processing lab
  • Laboratory inventory management system (LIMS) available

## Specialized Research Equipment/Service Cores:

<table>
<thead>
<tr>
<th>CORE</th>
<th>SCIENTIFIC DIRECTOR</th>
<th>TECHNICAL DIRECTOR/CONTACT</th>
<th>EQUIPMENT</th>
<th>LOCATION</th>
<th>SERVICES</th>
</tr>
</thead>
</table>
| Animal Physiology Core | Josh Maxwell, PhD joshua.t.maxwell@emory.edu | Ming Shen mshen@emory.edu | - Small animal ventilator  
- Cautery  
- Temperature monitoring  
- Anesthesia system  
- Dissecting microscope  
- Visualsonics Vevo 2100 High Frequency Ultrasound* | Emory-Children’s Center, 2nd Floor Lab | This core is a centralized resource specializing in survival surgery for rats and mice in addition to assistance with other USDA regulated animals such as rabbits, guinea pigs and piglets. The core director assists all investigators with development of IACUC protocols. Surgical services currently offered by the Core include pulmonary banding in rat and neonatal rabbit, aortic banding, myocardial infarction 5/6th nephrectomy for chronic kidney disease, liver-ischemia reperfusion and ultrasound guided injection ideally suited for targeted drug or cell therapy delivery. The Core also has available for use a Visualsonics Vevo 2100 High Frequency Ultrasound system that allows high resolution small animal ultrasound examinations for noninvasive measurement of in vivo structure and function. The Core Technical Director has been extensively trained in ultrasound techniques with many years’ experience thereby increasing reliability and reproducibility of imaging data. Studies can either be conducted in an assisted fashion or investigators can reserve the equipment and utilize their own laboratory personnel. |
| Biomarkers Core | Lou Ann Brown, PhD lou.ann.brown@emory.edu | Frank Harris harris@emory.edu | Agilent gas chromatography/mass spectrometer and Waters high performance HPLC with fluorescence detector | Emory-Children’s Center, 3rd Floor Lab | This cores analyzes markers of oxidative stress and markers of alcohol exposure. Speak to Scientific Director about other chromatography/mass spec assays available. |
| Cardiovascular Imaging Core (CIRC) | Ritu Sachdeva, MD sachdevar@kidsheart.com | Joan Lipinski, RDMS, RDMS joan.lipinski@choa.org | Echocardiograms - Flow Doppler  
- 3-D Imaging  
- Upright Bicycle  
- VO2 Analysis  
- Electrocardiogram  
- Cardiac MRI | Outpatient Cardiac Services, 2nd Floor, Tower 1 | This core provides non-invasive cardiac support for investigators involved in clinical research involving infants, children and adolescents. The CIRC has dedicated space, equipment and staff to provide you with quality cardiovascular imaging data that is collected in a meticulous, systematic, detail-orientated manner. Because of our unique set-up, we are able to utilize state-of-the-art imaging modalities not typically seen in the clinical setting. |
| Flow Cytometry/Cell Sorting | David Archer darcher@emory.edu | Technical Director for Core: Aaron Rae aaron.j.rae@emory.edu | BD FACs Canto II Flow Cytometer - Lab E-362, HSRB  
BD LSRII Flow Cytometer - Lab E-362, HSRB  
BD LSRII Flow Cytometer - Lab E-362, HSRB  
BD FACS Aria II Cell Sorter - Lab E-362A, HSRB  
ImageStream X Mark II - Lab E-362, HSRB  
Luminex 100 Analyzer - Lab E-362, HSRB  
CTL-ImmuNoSpot-S6 Micro Analyzer (ELISPOT Reader) - E-480, HSRB | Health Sciences Research Building, E362 | This core offers access to several state of the art analytical flow cytometers and Luminex as well as high-speed cell sorting. We also offer training as well as expert help to enable our users to improve the quality and scope of their research. The facility provides flow cytometric analyzers and Luminex for the following applications:  
Immunophenotyping  
- Cell Cycle  
- Ploidy  
- Mitochondrial Potential  
- Apoptosis  
PhosFlow  
- Live/Dead  
- Cell Proliferation  
- Oxidative Burst  
- Cytokine levels in serum and plasma  
- Gene and protein expression in cells and body fluids |
<table>

</table>
| **Medical Imaging Resources**            | Radiologists at Children's Hospital  | Nadja Kadom, nadja.kadom@emory.edu | • Access to clinical CT (4), PET (1), Bone Densitometry (2), Fluoroscopy (8), Nuclear Medicine (4), Ultrasound (9) and X-ray.  
  • Access to 6 clinical MRI scanners including a 1.0T intraoperative, 1.5T and 3T systems.  
  • Access to 2 fMRI systems.  
  • Sedation Services  
  • Access to radiology investigators specializing in radiology, neuroradiology and interventional radiology.  
  • Access to MRI physicists (3).  
  • Access to research professionals including administrators and research coordinators.  
  • Administrative services including scheduling, archival of images | Health Sciences Research Building, E264 | We provide a cross-disciplinary scientific, administrative, and educational home for imaging science through the Emory Center for Systems Imaging (CSI) and the Pediatric Imaging Research Core (PIRC) at Children's Healthcare of Atlanta.  
  Inpatient Imaging Resources  
  Outpatient Imaging Resources |
| **Children's Clinical & Translational Discovery Core** | Chris Porter, MD, chris.porter@emory.edu  
 Bradley Hanberry, PhD, bradley.hanberry@emory.edu | Freezers (-80, LN2) | New Biological Samples  
 • Collection  
 • Processing  
 • Storage in a variety of storage media and freezers, including liquid nitrogen and -80 degree freezers. Monitoring systems ensure 24/7 specimen integrity.  
 • Distribution - Specimens are tracked electronically via the Nautilus LIMS System.  
 Samples Available for Withdrawal  
 • PBMCs, plasma, whole blood, DNA, and urine from pediatric patients with immune-mediated disorders, solid organ transplant recipients and/or patients with end-stage organ disease who are awaiting organ transplant  
 • Blood and urine from living kidney donors and healthy controls with renal diagnoses of rejection, stable function or viremia  
 • Clinical data also can be made available upon request. | Health Sciences Research Building, E264 |

### Imlay Innovation Fund

Intended solely to support collaborative activities and pediatric innovation and discovery efforts between Georgia Tech and Children’s, focusing on practical steps that will lead to clinical impact as well as potential commercial opportunities.

Two types of projects are eligible for funding:

1. **Quick Wins: Quick Wins (QW)** allows Children’s clinicians and clinical administrative leaders to bring problems that impact care delivery to the attention of scientists and engineers at Georgia Tech to help develop innovative solutions. Successful projects have ranged from pediatric specific surgical device development in partnership with a surgeon and biomedical engineer to improvement of workflow in a busy outpatient clinic in partnership with physicians, clinical administrative leadership, architectural researchers, and industrial engineers. Quick Wins supports projects that can be accomplished in 12-18 months and can be quickly translated into practice. It is possible, but not guaranteed, that a Quick Wins award could help to position an investigator for a successful Innovation Investment application (described below) within the 2 years following the QW award. Quick Wins awards will be funded up to $125K.

2. **Innovation Investment:** Innovation Investment is intended to help bridge the funding gap that often blocks the next phase of implementation or commercialization after initial proof of concept. Innovation Investment awards should allow investigators to collect much-needed data, complete further proof-of-concept studies, or to produce prototypes for testing in order to effectively compete for extramural or investment funding. Innovation Investment projects will typically be funded for a one-year period. Applications for multi-year awards will be accepted only with prior approval, and can receive a total of no more than $250K. An important part of the proposal is a potential for commercialization and/or implementation, as well as potential to positively impact child health.
