Imaging Donut Day with BioTek featuring Lionheart™ FX Automated Live Cell Imager

Thursday, October 27 | 8:30 am - 11:30 am

HSRB Café

Lionheart™ FX is an inclusive microscopy system optimized for live cell imaging with up to 100x air and oil immersion magnification.

Live and fixed cell imaging workflows benefit from these features and more:

- Brightfield, color brightfield, phase contrast and fluorescence channels
- Label-free cell counting for cell proliferation studies
- Incubation to 40 °C and CO₂/O₂ control
- Humidity chamber for long term live cell imaging workflows
- Gen5™ 3.0 software: Automated image capture and analysis, plus annotation and movie maker functions

Lionheart™ FX Automated Live Cell Imager

Augmented Microscopy™ is the combination of all of these features in one compact system. With Lionheart FX, you can capture, analyze, annotate and produce videos with ease.
