Seminar

Ensuring ChIP-Seq Success and Novel Epigenetic Assays

Speaker: Dr. Kate Cunningham

Technical Product Manager

Active Motif, Inc.

Epigenetic mechanisms play a key role in defining gene regulation programs in disease. Examining genome-wide changes in the epigenetic landscape can be the first step in determining the mechanisms contributing to your disease model.

Active Motif provides technologies like ChIP-seq, ATAC-seq, and RNA-seq to identify histone post-translational modifications, transcription factor binding, chromatin structure, and the resulting changes in gene expression. Come learn about epigenetic tools that can be used to enhance your research.

DATE: Thursday, April 4th 2019

TIME: 10-11 AM

Emory University Children's Center

ECC Building Room 202

Host : Dr. Changwon Park

EMORY UNIVERSITY

ACTIVE MOTIF®

Enabling Epigenetics Research
